Linux, ubuntu, Heroku, Apache

Education

Completed Web Development

10 Minute Program

About Me

My name is Nazmul Islam, a dedicated software engineer with 4 year experience in Python, Django, and full-stack development. I specialize in creating scalable web applications with a focus on clean, efficient code. My experience includes front-end technologies like Bootstrap and HTMX, alongside backend optimization. I'm passionate about solving complex problems and continuously enhancing my skills in software engineering.

Work Experience :

Junior Developer

Muhul Soft Ltd Jhenaidah Dhaka Bangladesh
2022-2024

Led the development of multiple full-stack web applications, optimizing system performance, and ensuring project scalability. Collaborated with cross-functional teams to implement efficient software solutions using Django, Python, and modern front-end technologies. Played a key role in driving code quality and project delivery.

Software Engineer

TechNova Solutions Dhaka Bangladesh
2021 - 2022

Developed and maintained complex backend systems for enterprise-level applications. Spearheaded automation and integration efforts, reducing manual processes and improving operational efficiency. Utilized cloud-based services and microservices architecture to enhance application performance and scalability.

Junior Developer

Innovative Coders Ltd Khulna Bangladesh
2020 - 2021

Worked on a range of client projects, delivering clean and maintainable code. Assisted senior developers in debugging and testing applications, learning key development principles. Gained hands-on experience with front-end technologies, version control systems, and agile development practices.

Project :

Sports

Sports Project Overview

The Sports project is an innovative platform designed to bring together sports enthusiasts, providing real-time updates, team management tools, and player statistics. Built with a robust backend using Django, the platform focuses on delivering a seamless user experience. Users can engage with various sports categories, track live scores, and participate in sports-related discussions. The project leverages responsive design techniques to ensure accessibility across devices, making it an all-in-one solution for sports fans and professionals alike.
